Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, 5-8, 10-22, drawn to factor X analogues in which Thr-Arg-Ile at the activation site is replaced, DNA encoding said analogs, and methods of making and using said analogues.

Group II, claim(s) 23-24, drawn to a method of treating coagulopathy utilizing said analogue.

Group III, claims 4, 25-30, drawn to factor X analogues which can be obtained by a cleavage of factor X analogues wherein said factor X analogues are those recited in Group I, DNA encoding said analogues and methods of making and using said analogues.

Group IV, claim(s) 4, 25-30, drawn to factor X analogues which can be obtained by a cleavage of factor X analogue analogues, DNA encoding said analogues and methods of making and using said analogues.

It should be noted that **Groups I-II inventions are generic** to the following patentably distinct inventions of unrelated structure which lack a common technical feature: a factor X analogue comprising :

SEQ ID NO:31, wherein P3 represents any amino acid sequence with the exception of Pro, Asp or Glu, P2, represents any amino acid from the group consisting of Val, Ile, Leu, and Phe and P3', represents Gly, Asn or His, which constitute 50 or more sequences.

When electing Group I or II inventions, Applicant is advised to also elect a single sequence representing SEQ ID NO:31, wherein all residues therein (i.e. P3, p2 and P3') are fully identified, to be fully responsive to this restriction requirement. **This is not a species election.**

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical features of Groups I, III-IV are factor X analogue with Thr-Arg-Ile at the cleavage site, a factor X analogue which is obtained by cleavage of said Group I factor X analogue and a factor X analogue which is obtained by cleavage of said Group I factor X analogue analogue, which are each products of unrelated chemical structure and function and share no common technical feature.

Group I-II share a special technical feature, namely factor X analogue. However said inventions are not required to be rejoined under PCT Rule 13.1 because Group I already has a method of use of said analogue.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
